

The Magee Fund helps MA Boy Scout Council camps throughout New England upgrade to Clivus composting waste treatment systems.

George W. Magee Memorial Trust fund has made it possible for many Massachusetts BSA Council camps throughout New England to improve their facilities and bring them indoors while still preserving the natural environments of the camps. The Clivus composting systems installed at these and other camps use no water, discharge no polluting waste, and help replenish natural resources. Scouts also get a lesson in preservation!

Outdoor pit toilets & urinals

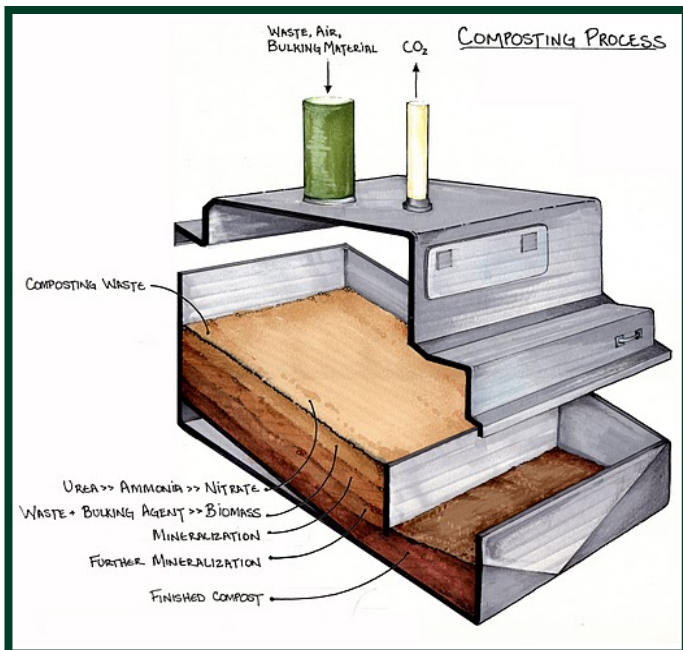

Other BSA Camps: Camp Wah Tut Ca - Camp Grenough - Lone Tree Scout Reservation

Scouts appreciate sanitary, comfortable, indoor facilities!

Clivus offers ADA compliant toilet fixtures.

All Clivus systems are NSF Standard 41 Tested and Certified

Composting takes place in all soils which support plant and animal life. The Clivus systems employ the same process in the controlled environment of the composting chamber. As waste breaks down in the composter a less chemically complex, more chemically stable substance rich in organic matter and very similar to soil is produced. Human waste consisting mostly of water is reduced by over 90%. By-products of the composting process are water vapor and CO₂ and are released harmlessly into the atmosphere through the ventilation system.
