

Municipal Park

Slater Park Pawtucket, RI

Profile

- Historical city park in need of restrooms
- Tennis courts and bike path
- Playground
- Petting zoo
- Carousel
- Picnic area

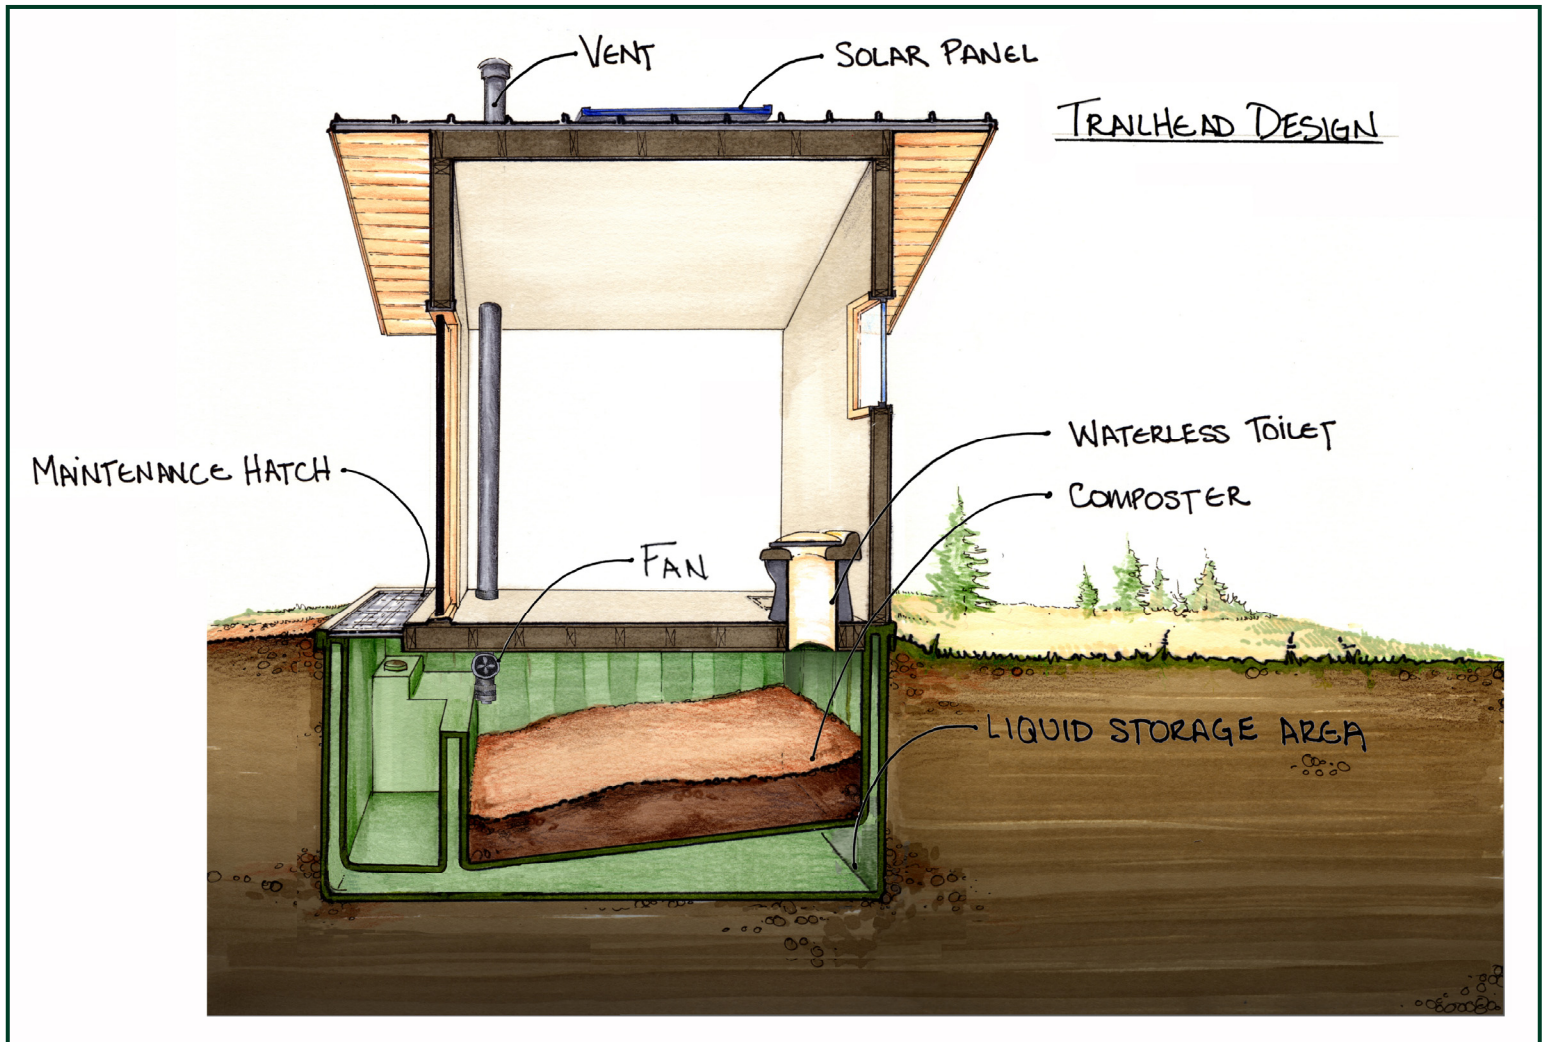

Challenge

- Encourage prolonged, healthy outdoor activity
- Provide safe, sanitary restrooms
- Portable, rented toilets are unappealing and prone to 'tipping'
- Too costly to connect to sewer
- No septic or water on site

Solution

- Installed Clivus self-contained composting restroom buildings
- Eliminated sewage and wastewater
- Partially funded through HUD **Community Development Block Grant**

All Clivus systems are NSF Standard 41 Tested and Certified

The Clivus Model C11 trailhead restroom is a heavy duty building with a self-contained composting waste treatment system. There is no discharge of waste or pollution, site disturbance is limited to the footprint of the building, and the ventilation fan can be operated with solar power if necessary.

These units are all ADA accessible and can be placed in remote areas.
